CURRENT AND PENDING (OTHER) SUPPORT INFORMATION

Provide the following information for the Senior/key personnel and other significant contributors.
Follow this format for each person.

*NAME: Mann, Michael

PERSISTENT IDENTIFIER (PID): https://orcid.org/0000-0002-6268-6867

*POSITION TITLE: Associate Professor

*ORGANIZATION AND LOCATION: George Washington University, Washington, District of Columbia, United States

Proposals and Active Projects

***Proposal/Active Project Title:**	Crisis Resilient School Meals in Haiti: Food System Analysis and Anticipatory Data
***Status of Support:**	Current
Proposal/Award Number:	
***Source of Support:**	Rockefeller Foundation / Long Tables Foundation
***Primary Place of Performance:**	Washington DC
***Proposal/Active Project Start Date: (MM/YYYY):**	01/2026
***Proposal/Active Project End Date: (MM/YYYY):**	12/2027
***Total Anticipated Proposal/Project Amount:**	$450,000

*** Person Months per budget period Devoted to the Proposal/Active Project:**

Year	Person Months
2026	1
2027	1

***Overall Objectives:**

Aligned with the Rockefeller Foundation's Reimagining Humanitarian Nutrition Security (RHNS) initiative, the pilot will demonstrate how locally anchored, anticipatory, and shock-responsive food systems can take root in fragile settings. Led by Acceso, in partnership with Summits Education and the Haiti Food Systems Alliance, the program will strengthen farmer production, build decentralized supply-chain infrastructure, improve school feeding, and pilot early-warning and predictive data tools. Through the broader Longer Tables Fund (LTF) initiative and independently-funded RHNS partners, the project's learning, analysis, and scalability will be significantly strengthened.
Over two years, the pilot will deliver: daily locally sourced meals for 48,000 students; strengthened market access and income for 2,200 farmers; construction of a Community Collection Center and

Resilience Hub; over $1 million in new farmer income; and improved anticipatory and supply-chain systems that help communities withstand and respond to future shocks.
The project's theory of change is simple and powerful: if school meals serve as the anchor market for smallholder farmers, then the systems required to feed children every day – agriculture, aggregation, transport, storage, and data – become the backbone of a stronger, more resilient local food system.

***Statement of Potential Overlap:**

None

***Proposal/Active Project Title:**	Air quality and health improvements from restoring the Great Salt Lake ecosystem
***Status of Support:**	Pending
Proposal/Award Number:	
***Source of Support:**	NASA
***Primary Place of Performance:**	Washington DC
***Proposal/Active Project Start Date: (MM/YYYY):**	02/2027
***Proposal/Active Project End Date: (MM/YYYY):**	01/2030
***Total Anticipated Proposal/Project Amount:**	$1,199,259

*** Person Months per budget period Devoted to the Proposal/Active Project:**

Year	Person Months
2027	0.57
2028	0.57
2029	0.57

***Overall Objectives:**

This project will develop an accessible tool that rapidly estimates dust concentrations, health impacts, and their economic value across a range of GSL lake levels. First, we will combine NASA satellite observations (VIIRS, PACE, MERRA-2) with USGS topobathymetric data to estimate how dust concentrations respond to changes in exposed lakebed area. Second, we will apply those sensitivities to 171 lake levels between 4,188 ft and 4,205 ft. For each level, we will estimate census tract–level dust concentrations, premature deaths and illnesses using established PM2.5 health impact functions, and economic costs using federal valuation methods, with full uncertainty analysis. Third, we will co-design an interactive web map and a plain-language communications toolkit with the Davis County Health Department. These will let residents and decision-makers see how lake levels affect their own communities.

***Statement of Potential Overlap:**

None

Certification:

I certify that the information provided is current, accurate, and complete. This includes but is not limited to current, pending, and other support (both foreign and domestic) as defined in 42 U.S.C. § 6605.

I also certify that, at the time of submission, I am not a party to a malign foreign talent recruitment program.

In accordance with section 10634 of the CHIPS and Science Act of 2022 (42 U.S.C. § 19234), I certify that I have completed the requisite research security training that meets the requirements specified in NASA's research security training requirements guidance within 12 months prior to proposal submission.

Misrepresentations and/or omissions may be subject to prosecution and liability pursuant to, but not limited to, 18 U.S.C. §§ 287, 1001, 1031 and 31 U.S.C. §§ 3729-3733 and 3802.
